

## System Design

Pro/Mark offers professional design services for all of the products that we represent. Whether your project is small or large, general or custom, we come to you with the assistance and information that you need to ensure the best application for your budget. We primarily work with;

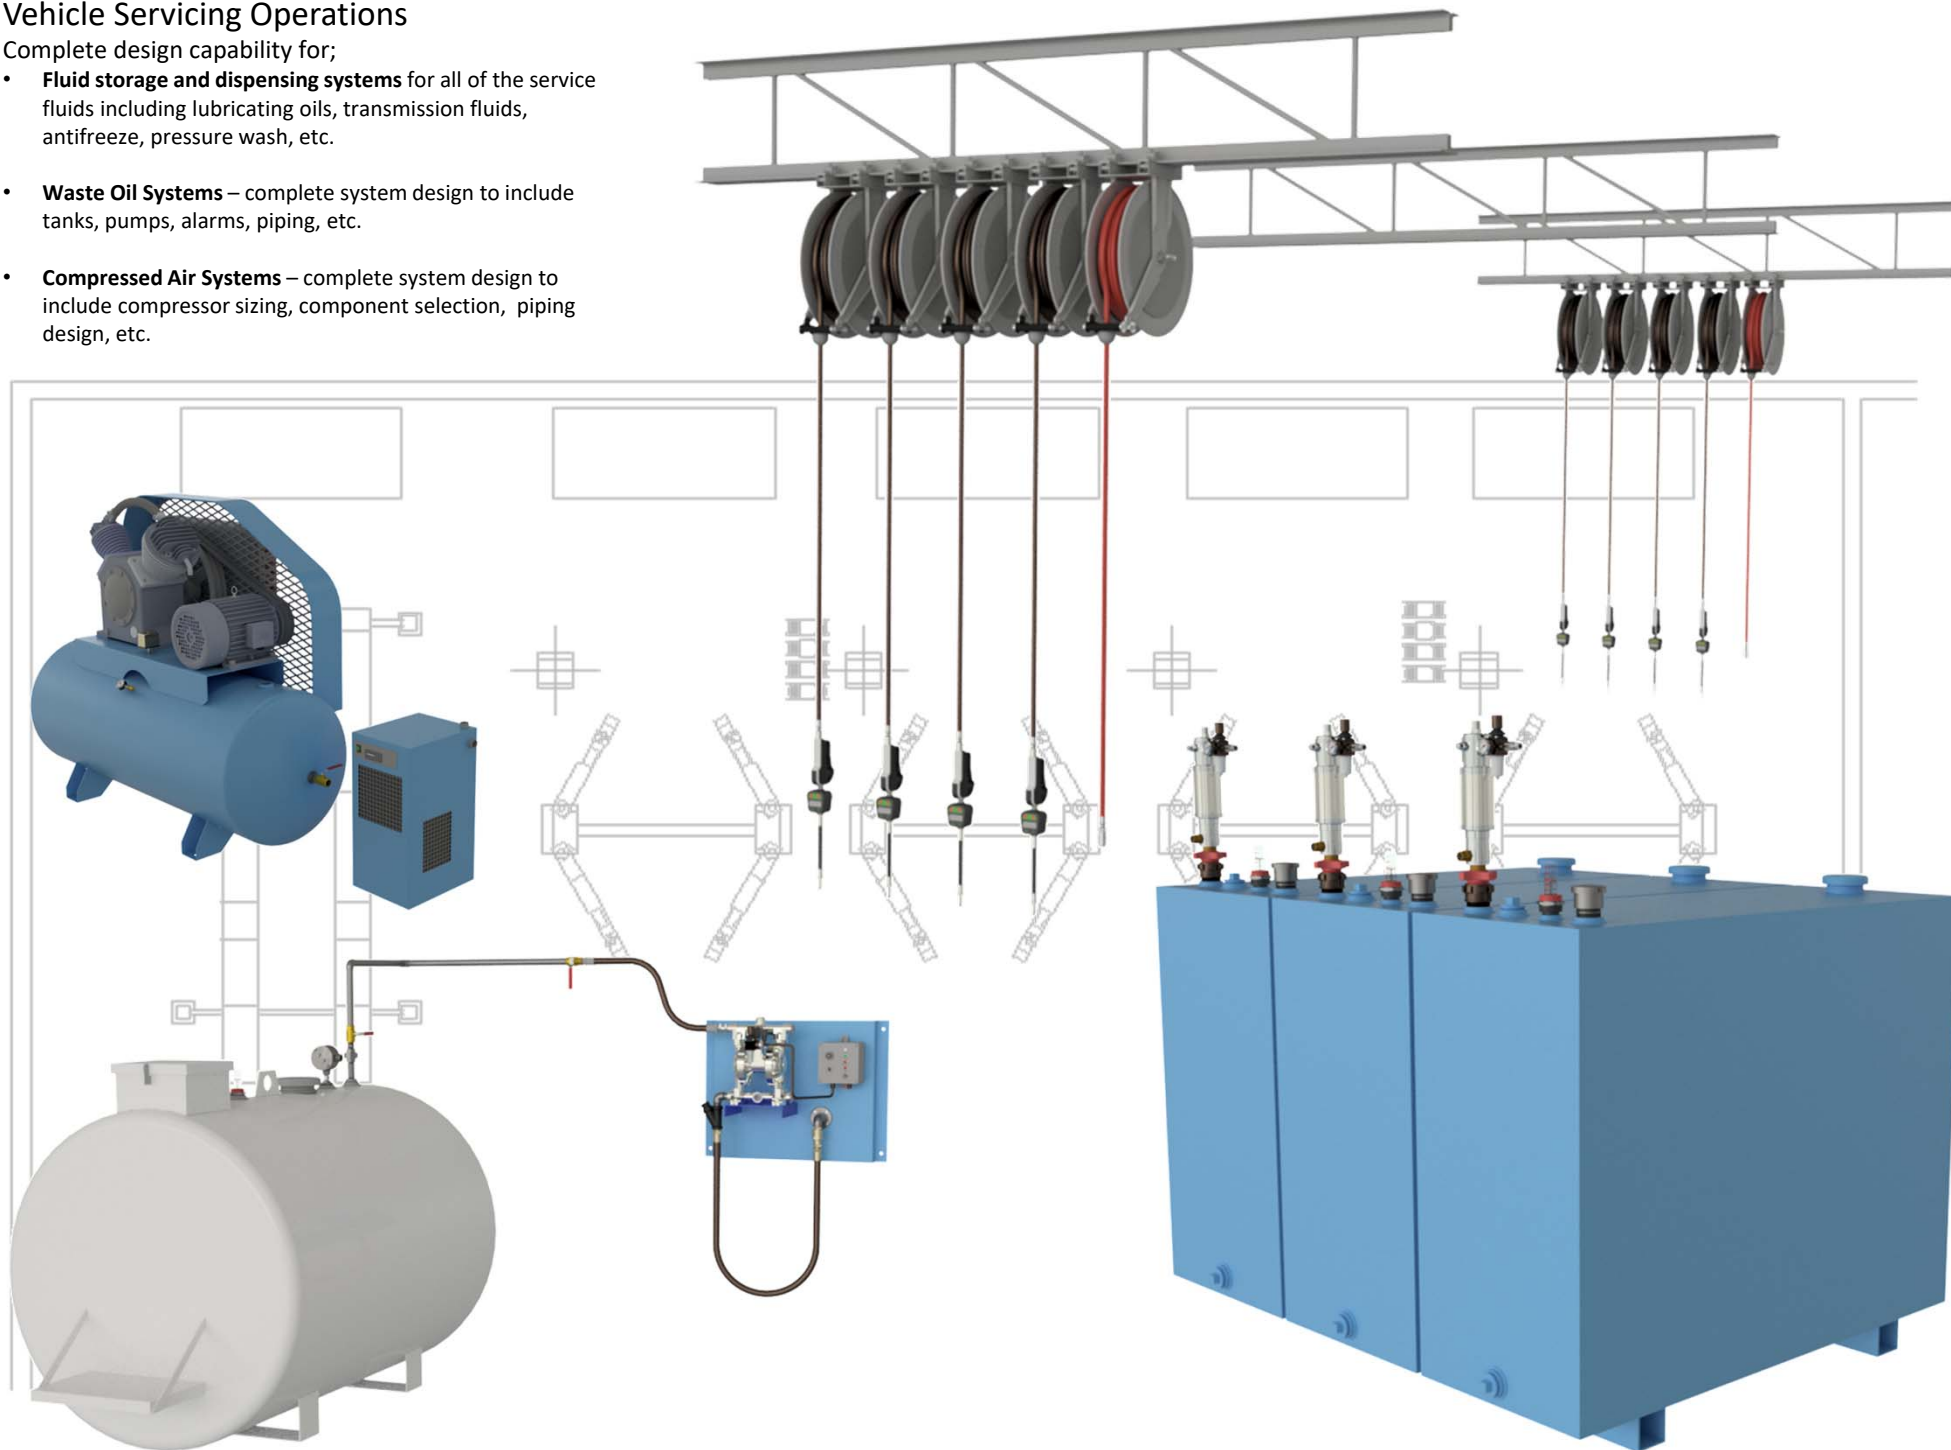

- **Fluid Storage and Handling Systems**  
For lubricants, hydraulic fluids, metal working fluids, grease, transmission fluids; etc.  
For industrial production and maintenance applications, vehicle servicing applications, etc., etc.
- **Metal Working Fluids**  
Filtration, recycling, application, transfer, blending systems, etc.
- **Centralized and Automated Lubrication Systems**  
For production and maintenance applications.
- **Mobile Equipment**  
Custom carts – manual and powered, lube skids, lube trucks, etc.

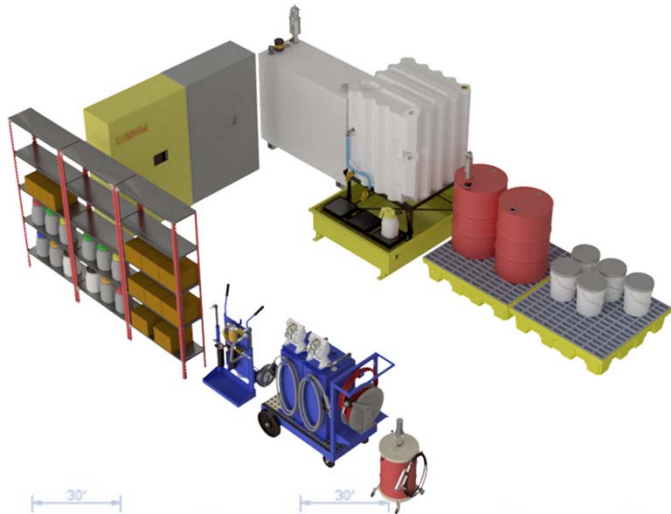

## Vehicle Servicing Operations

Complete design capability for;

- **Fluid storage and dispensing systems** for all of the service fluids including lubricating oils, transmission fluids, antifreeze, pressure wash, etc.
- **Waste Oil Systems** – complete system design to include tanks, pumps, alarms, piping, etc.
- **Compressed Air Systems** – complete system design to include compressor sizing, component selection, piping design, etc.

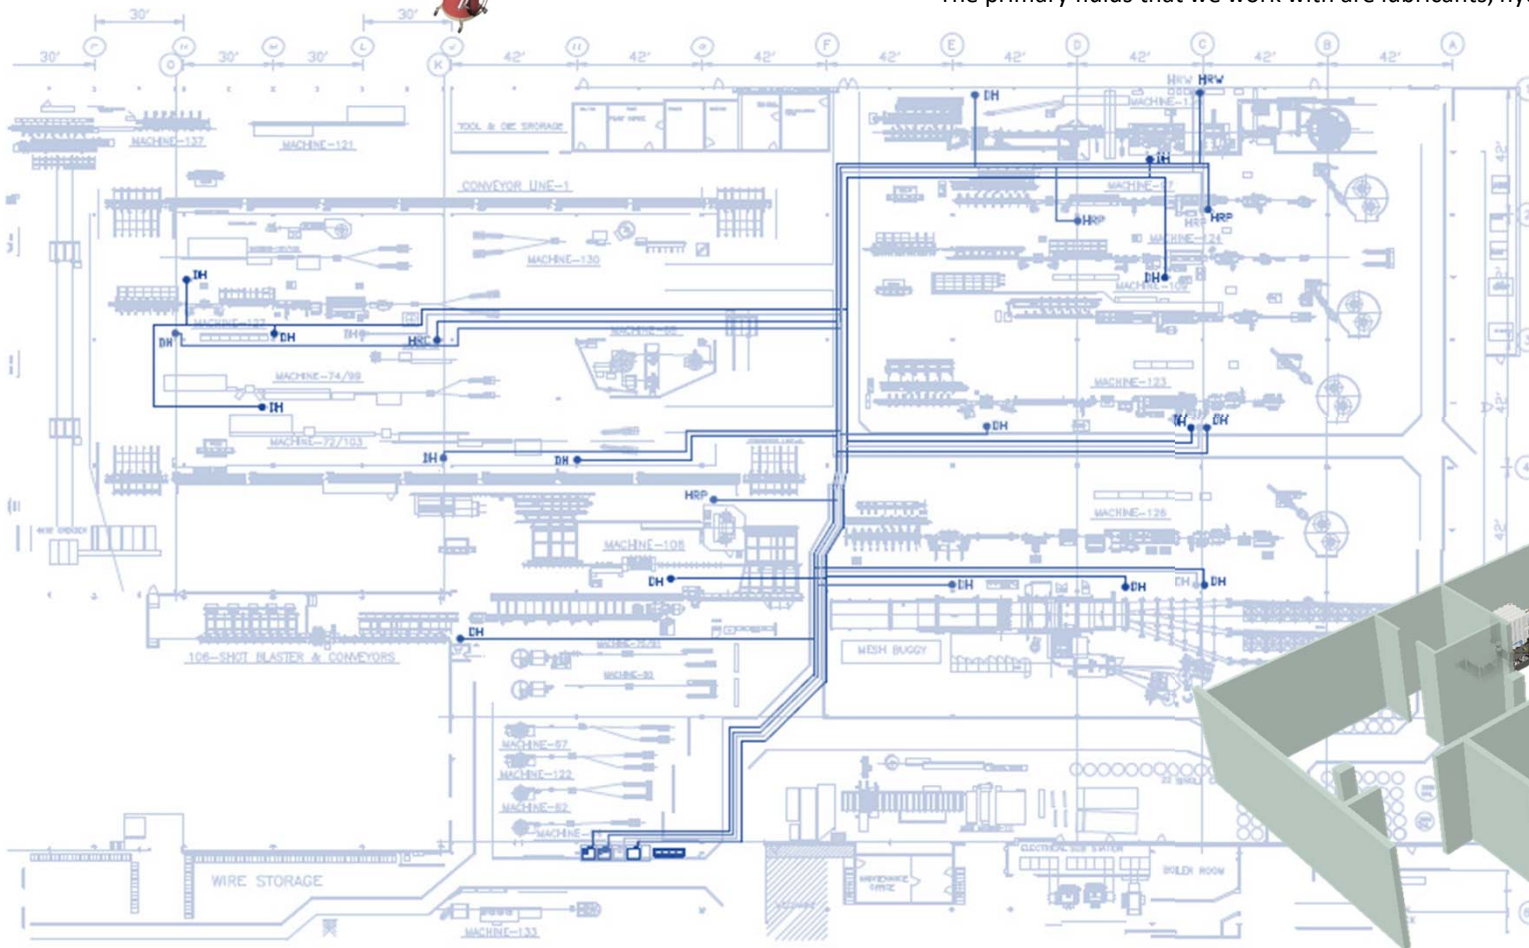

## Manage Your Fluids

A well planned fluid storage and handling process can;

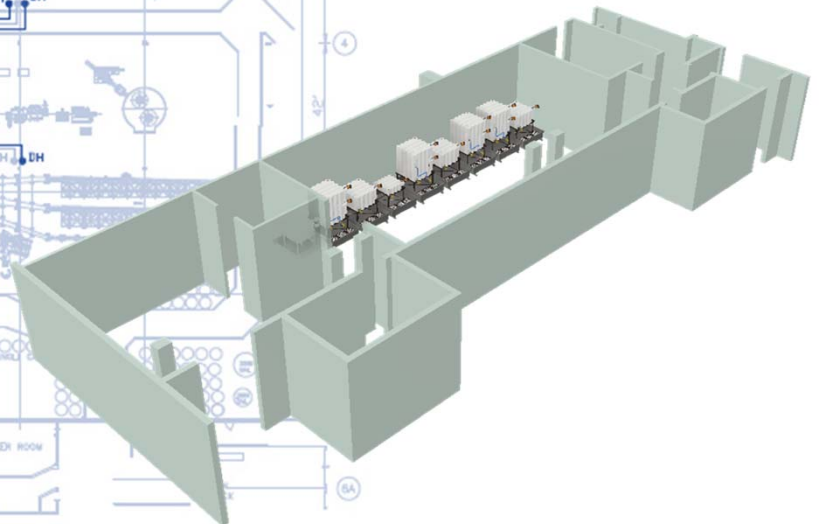

- Provide effective inventory control.
- Reduce the risk of environmental incidents.
- Improve workplace safety.
- Improve the workplace environment.
- Reduce handling costs.
- Improve productivity.

Pro/Mark offers over 35 years of experience in the design, fabrication and installation of fluid storage and handling systems supported by both 2D and 3D design capabilities. Whether your requirements are large or small, we will come to you with the assistance and information you need to plan your fluid handling processes and guide you in your equipment selections for maximum effectiveness.

The primary fluids that we work with are lubricants, hydraulic fluids, grease, metal working fluids.

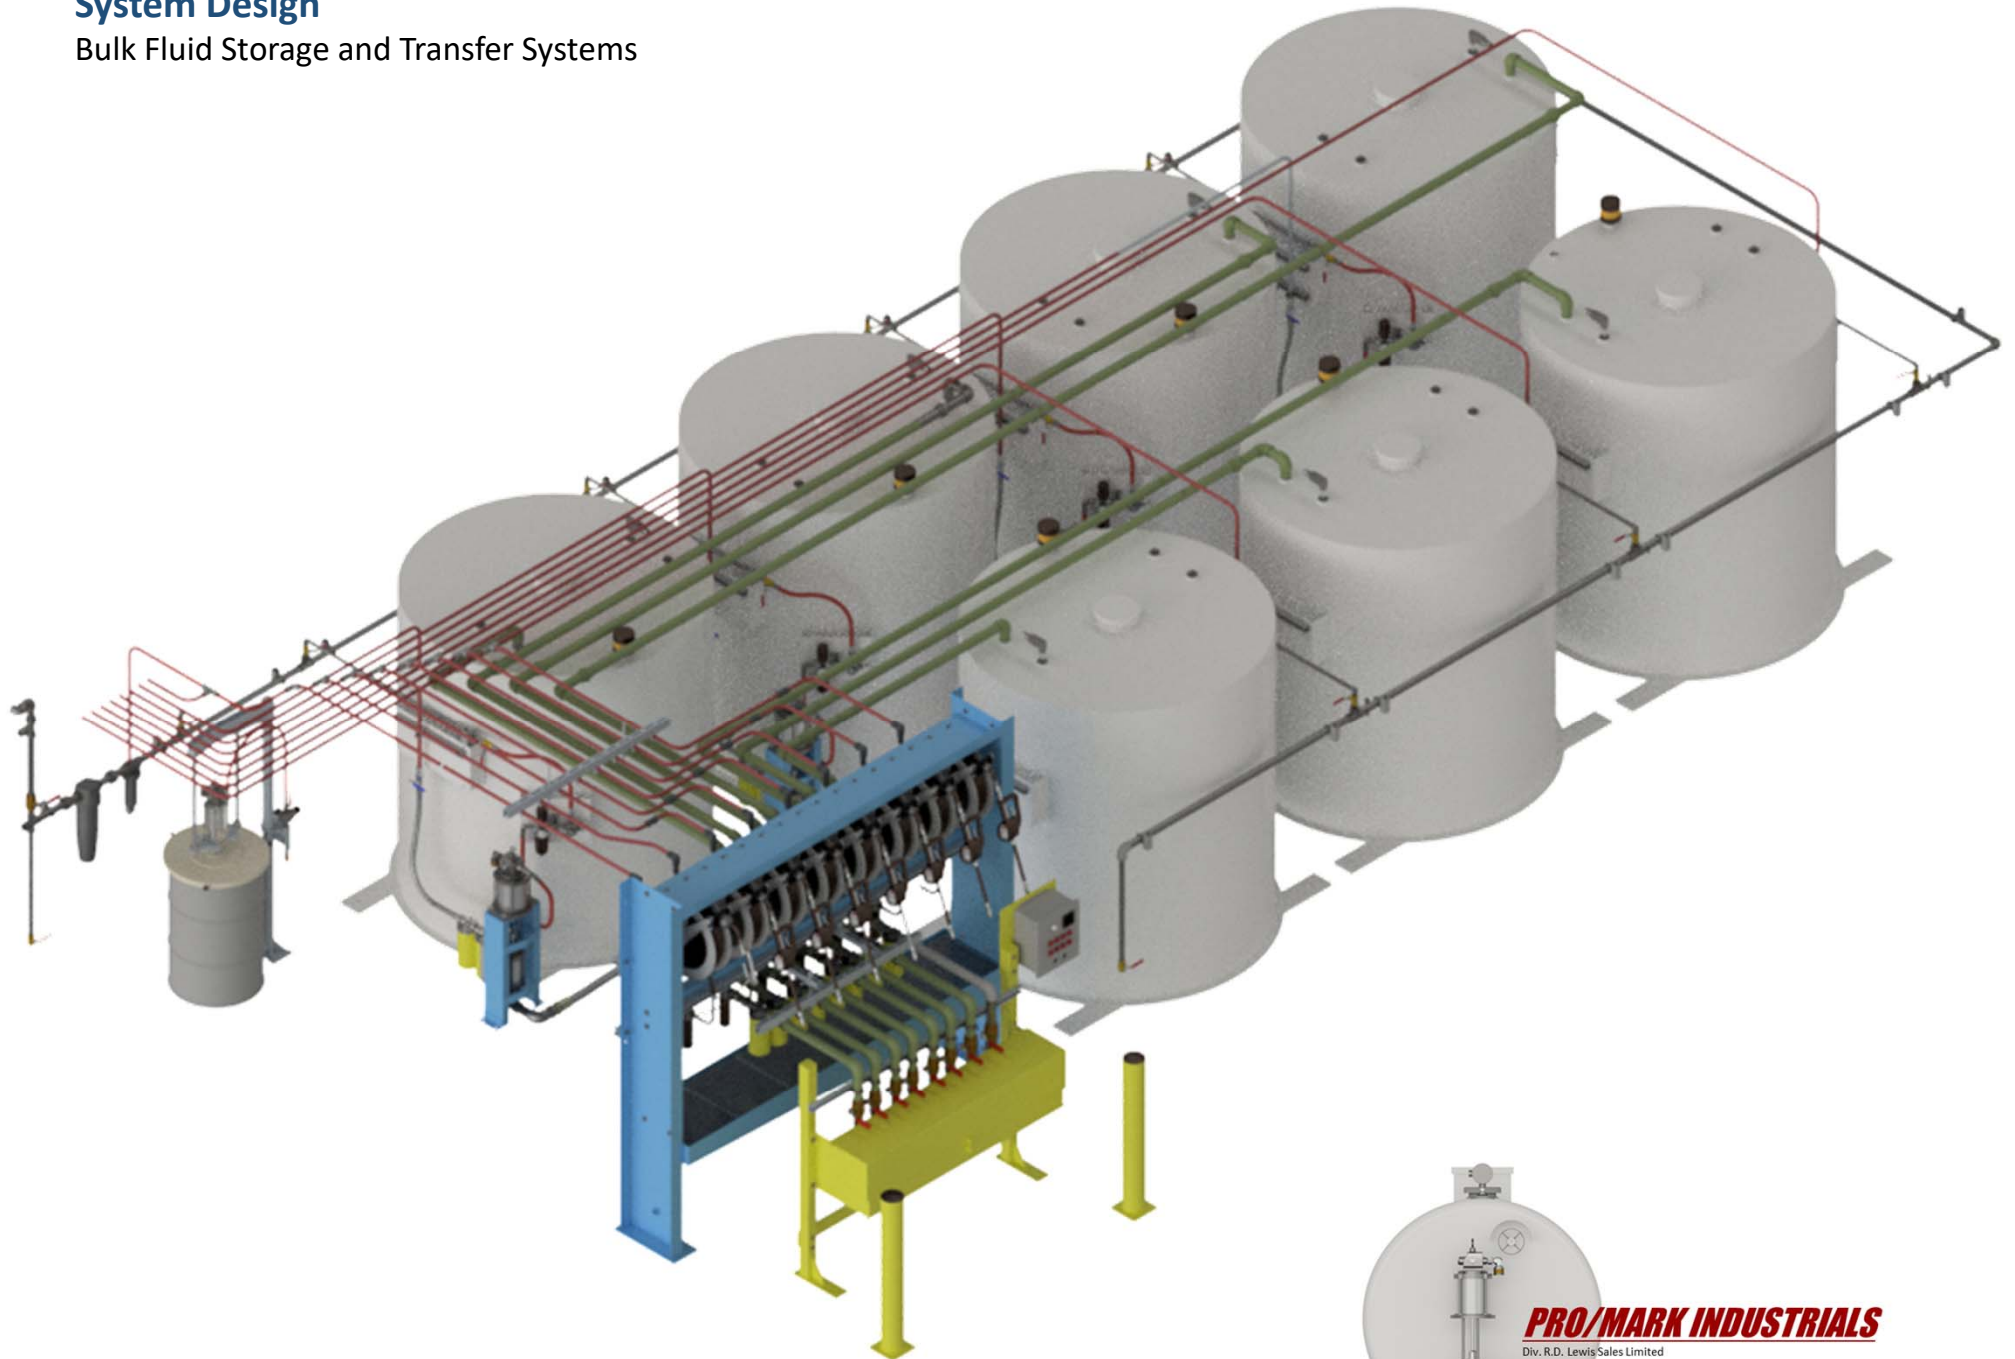

- Storage systems
- Piped transfer systems
- Dispense systems
- Portable equipment
- Filtration
- Recycling
- Level monitoring
- Inventory control systems

## Mobile Lube Skids

**Lube skids provide an efficient and versatile means of transferring lubricants and related service fluids to your equipment.**

- Custom designed to suit your specific needs.
- For the servicing of off road equipment.
- For in plant servicing of machinery.
- Reservoir capacities to suit the application.
- Diverse pump offering – pneumatic, electric and manual.
- Hose reels - air, fluid and electric.
- Dispense valve and meter options.
- Filtration options.
- Waste oil handling and transfer.

Pro/Mark offers over 35 years of experience in the design, fabrication and installation of fluid storage and handling systems. Whether your requirements are large or small, we will come to you with the design assistance you need to plan your lube skid to suit your specific needs and achieve maximum productivity and effectiveness.
