

### POD Storage Systems

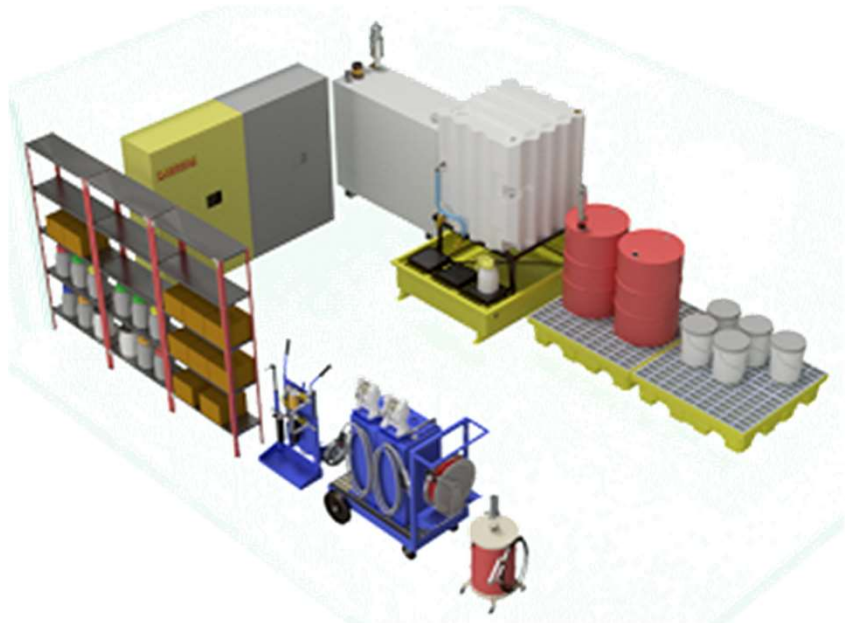

Lubrigard's POD Storage Systems provide a clean, efficient and convenient means of storing and dispensing lubricants. Several options are available to satisfy the requirements of most applications.

- **Stacked tank design saves floor space.**
- **Spill containment protection.**
- **Gravity or pump based dispensing.**
- **Filter options**
- **Colour coded product identification.**

### Lubricant Storage Rooms

#### Planned and Designed

A well thought out lubricant storage and handling area is critical to the success of your lubrication program. A well planned system can protect against product contamination, enhance inventory control, reduce handling expense, improve workplace safety and reduce environmental risk. We will come to you with all the planning assistance you need to configure your lubricant storage and handling process and assist in the equipment selections that assure optimum effectiveness.

### Mobile Lube Carts

Deliver your lubricants to the point of use cleanly and efficiently. Several standard carts are available. Carts can be constructed to meet individual requirements for capacity, dimensions, pump systems, hose reels, multiple lubricants, etc.
