

Vertical round tanks are suited for applications where space might be an issue. Although vertical tanks may make better use of floor space, they are generally higher than horizontal tanks. Vertical tanks may require provisions to accommodate the safe filling of the tanks such as remote fill systems, catwalks, approved ladder systems, etc.

1. Emergency Vent
2. 2" Threaded Fitting
3. 2" Vent
4. ULC Label
5. Vacuum Gauge

Material Gauge	Capacity	Diameter	Height	Weight
12	1,100 Liters	38"	60"	700 lbs
12	1,360 Liters	38"	72"	750 lbs
12	2,200 Liters	50"	72"	1,100 lbs
12	4,500 Liters	60"	96"	2,200 lbs
